Our Response to COVID-19

- We require all of our guests to use hand sanitizer and have their body temperature checked upon their arrival.
- All of our employees wear face masks in the facility.
- In order to prevent the spread of any airborne transmissions of infections, we may ask our guests if we could explain the details of the menu when we serve meals to them.
- We thoroughly disinfect every 'high-touch' area that our guests touch in the facility.
- We sterilize the guest rooms and public spaces in the facility by installing a hypochlorous acid water generator.
